Before you register a name

1. **Say it out loud.** Tell it to a friend on the phone and ask them to spell it.
2. **Check it is free.** Search your state's business name register and your county's DBA list.
3. **Check the web.** Look for the domain and the social handles you want.
4. **Picture the sign.** A short name reads better from the road and on a label.

Why it matters

The USDA Economic Research Service counted 116,617 farms selling food directly to consumers in 2022, at farmers markets, farm stands, u-pick, CSAs and online. Shoppers meet your name first, so make it one they remember.
