Hard reasoning

Free Gemini 3.1 Pro Arc puzzle practice Prompt

I will paste an ARC-AGI-2 style pattern puzzle with a small grid and one solved example. Work out the hidden transformation rule step by step, then apply it to the test grid and show the completed grid.

Free Gemini 3.1 Pro Planning under limits Prompt

I need to move a five-person team to three projects over four weeks. Each person has two fixed unavailable days a week. Build a schedule, check it for conflicts and flag the weakest week with a fix.

Science questions

Free Gemini 3.1 Pro Exam-level question Prompt

A grad-level GPQA-style chemistry question is pasted below. Answer it at graduate exam standard, show every calculation step, state your confidence and name the concept it tests.

Free Gemini 3.1 Pro Explain the paper Prompt

I will paste a physics paper abstract. Explain it to a strong undergraduate, define the key terms, describe the method and point out what the result changes for the field.

Research and coding

Free Gemini 3.1 Pro Multi-source research Prompt

Write a one-page summary of the current state of solid-state batteries. Compare approaches, name the main labs, list open problems and finish with the three questions a follow-up search should answer.

Free Gemini 3.1 Pro Algorithm build Prompt

Write a Python function that finds the top-k frequent words in a large text stream in one pass. Explain the data structures you chose, give the time complexity and include five test cases with expected output.
