17 FREE PROMPTS FOR GPT-5

The complete *GPT-5* prompt guide

GPT-5 is OpenAI's reasoning model for maths, code and hard questions. Every prompt in this guide is ready to send. Copy one into the GPT-5 chatbot on AIFreeForever, change the details in it to your own, and press Enter.

Maths

Free GPT-5 Math Prompt

Solve $3x^2 + 5x - 2 = 0$. Show every step, check both answers by putting them back into the equation, and explain each step in one short sentence.

Free GPT-5 Percentage Prompt

A shop raises a price by 20% and then lowers the new price by 20%. Is the final price higher, lower or the same as the first price? Work it out with an example of $50 and explain why.

Free GPT-5 Proof Prompt

Prove that the sum of any two odd numbers is always even. Write the proof in plain steps that a 14 year old can follow.

Free GPT-5 Savings Prompt

I save $150 every month in an account that pays 4% interest a year, added monthly. How much will I have after 5 years? Show the formula, the numbers you put in and the final answer.

Coding

Free GPT-5 Bug Fix Prompt

This Python function should return the second largest number in a list, but it fails when the list has repeated numbers: def second(nums): nums.sort() return nums[-2]. Find the bug, write a fixed version and add three test cases.

Free GPT-5 Code Explainer Prompt

Explain what this JavaScript does line by line, then tell me how it could fail: const total = items.map(i => i.price * i.qty).reduce((a, b) => a + b)

Free GPT-5 Python Script Prompt

Write a Python script that reads a CSV file called sales.csv with the columns date, product and amount, and prints the total amount for each product, sorted from highest to lowest.

Webpage

Free GPT-5 Webpage Prompt

Build a landing page in one HTML file for a bike repair shop called Spoke and Chain. Include a header, three service cards with prices, opening hours and a contact form. Use clean CSS with no libraries.

Free GPT-5 To-Do App Prompt

Make a simple to-do list app in one HTML file. I want to add a task, tick it as done and delete it. Save the list in localStorage so it stays after I reload the page.

Free GPT-5 Pricing Table Prompt

Write the HTML and CSS for a pricing table with three plans called Basic, Plus and Pro. Highlight the middle plan and make the table stack into one column on phones.

Charts

Free GPT-5 Chart Reading Prompt

Look at the chart I attached. Tell me what it measures, the highest and lowest values, and the three main things it shows, in simple words.

Free GPT-5 Screenshot Table Prompt

Read the table in the screenshot I attached and turn it into a clean markdown table. Then tell me which row has the biggest change from the first column to the last.

Research

Free GPT-5 Science Prompt

Explain how vaccines train the immune system. Use simple words, give one everyday comparison, and end with three facts that I should check with a doctor or an official health site.

Free GPT-5 Comparison Prompt

Compare solar panels and heat pumps for a family home. Make a table with cost, savings, upkeep and how long each lasts, and tell me which numbers change most from country to country.

Free GPT-5 Long Report Prompt

Read the long report I attached and list every date, name and amount it mentions in a table. Add the page number for each one.

Email

Free GPT-5 Email Prompt

Write a polite email to my landlord asking for the broken heating to be fixed this week. Mention that I reported it 10 days ago and keep it under 120 words.

Free GPT-5 Email Rewrite Prompt

Rewrite this email so it sounds clear and friendly, and keep it short: Hi, the report is late again and I need it now because the client is waiting and nobody told me.
